Subject: 18300 LA Stadium: Request for Sightline-Constraint Guard Height Ruling

Mr. Berg,

Per my conversations with Amit Gupta – Senior Cal/OSHA Engineer, it was suggested I request written documentation from you regarding the recent ruling (based on Golden 1 Center in Sacramento, CA) allowing building code requirements for sightline-constraint guard height (26" high minimum) at tiered seating arrangements. It is my understanding that this ruling will be applicable to the LA Stadium project in Inglewood, CA (under construction). Please let me know if you need any information from us. Thanks.
